‘People are our most valuable asset’ is a cliché which no member of any management team would disagree with. Human Resource Management is the strategic and coherent approach to the management of an organization’s most valued asset: the people, working individually and collectively to contribute to the achievement of business objectives.

The basic challenge facing all organizations, managers and employees is that of ‘change’. The world is constantly changing and the rate of change is now becoming faster; organizations must absorb and manage change at a much faster rate than in the past. To implement a successful business strategy to face this challenge, organizations whether large or small, must ensure that they have the right people capable of delivering this strategy.

The HR Research Conference ‘09-10 is an initiative to discuss and debate some of the key issues and challenges facing the new world and, the HRM strategies effectively countering them.
Aims & Objectives

- To bring out latest research on strategies of HRM.
- To articulate and deliberate the unexplored areas of Human Resources that effectively meet the emerging challenges at work place.

Sub-themes:
- HR as a strategic business partner
